Press Release 8/1/05

The Scott Piston Puller

SMP Specialty Tools, Inc. introduces a new and unique tool designed to give the diesel engine technician a valuable advantage. **The Scott Piston Puller makes tear downs quicker, easier, and more profitable.** The tool, built from heavy duty steel, grips the combustion bowl of the piston and allows the technician to pull the piston from the top of the engine. It virtually eliminates the possibility of damage to internal engine components. It is a must have tool for every shop!

The Scott Piston Puller is suitable for most popular small and medium sized combustion bowl type diesel engines. It fits combustion bowls of approximately 2" to 3-3/4". **Applications include truck, bus, industrial, and marine diesel engines.**

Read our Reviews

"What a great tool! Any company that wants to save time and money should own a Scott Piston Puller." *Rudy Buchar, Owner, Atlantic Marine Power*

"This tool can pay for itself the first time it is used for piston removal. It's a real time saver and time is money." *Pat Riccie, Owner, Diesel Mechanics CO OP*

"Leave the block of wood and hammer in your toolbox!"
Dan Clauser, Owner, Dan's Diesel Service

"The Piston Puller continues to work well in our lab. It was even used recently to remove a piston that had stuck in the liner after the rod had broke the pin out of it."
Generator Engine Manufacturer

"Our technicians would not go to a teardown without this tool."
Bob Steel, Service Manager, Scott Marine Power
